

SKIPY

Backend & Full-Stack Engineer

Moscow, Russia · UTC+3 · github.com/skipydev · skipyy1@proton.me

PROFILE

Backend-leaning full-stack engineer who builds complex server-side solutions and full-featured web applications. Focused on reliable, fast systems that hold up under load, with a disciplined approach to clean code and a strong, self-taught command of the Linux environment. Comfortable working independently end-to-end, from data layer to UI.

EXPERIENCE

IT Internship — Backend / Full-Stack

2026 – Present

- Working on real, production-facing tasks in commercial software development.
- Applying theoretical knowledge in practice, taking structured feedback, and optimizing backend processes.

Independent Practice — Cybersecurity & Systems

Ongoing

- Hands-on security training through practical Hack The Box challenges.
- Daily systems administration and environment tuning on a Linux (CachyOS / Arch-based) setup.

Academic Preparation — Olympiads & University Entrance

In Progress

- Preparing for technical university admission: algorithms, non-standard mathematics, and exam prep (Physics, Computer Science, English).

SKILLS

Backend & DB	NestJS, Node.js, Go, PostgreSQL, Prisma, Redis, SQL
Frontend	React, Next.js, TypeScript, Tailwind CSS, HTML5, Vite
Infrastructure	Linux, Docker, Git, Nginx
Languages	TypeScript / JavaScript (strong) · Python (working) · C++ / Go (familiar)

EDUCATION

Currently completing secondary education in Moscow, preparing for technical university entrance examinations.
